General information

EPD Owner	Gavazzi Controls S.p.A., Via Lunigiana, 46 20125 - Milano (MI) Italy www.gavazzi-automation.com
Reference production site(s)	Belluno plant: via Safforze, 8, 32100 – Belluno (BL)
Scope of application	This document refers to the device of the METERS family.
Programme Operator	EPDIItaly - info@epdiItaly.it
Independent Verification	<p>This declaration was developed according to the EPDIItaly Regulations; further information and the Regulations themselves are available at www.epdiItaly.it</p> <p>Independent verification of the declaration and data carried out according to ISO 14025:2010 <input type="checkbox"/> _Internal <input checked="" type="checkbox"/> _External</p> <p>Third-party verification performed by: ICMQ SpA, via De Castillia, 10 20124 - _Milan (www.icmq.it) Accredited by Accredia</p>
CPC Code	4621 "Electricity distribution or control apparatus"
Company contact	<u>Giampaolo Tormen</u> , Certification Manager in Gavazzi Group.
Technical support	 Aequilibria Srl - SB P.le della Stazione, 8 35131 – Padova (PD) - ITALIA
Comparability	Environmental statements published within the same product category, but from different programs, may not be comparable. In particular, EPDs of similar products may not be comparable if they do not comply with the relevant Technical Standard.
Responsability	Carlo Gavazzi Controls S.p.A. releases EPDIItaly from any non-compliance with environmental legislation. The holder of the declaration will be responsible for the supporting information and evidence; EPDIItaly disclaims any responsibility regarding the manufacturer's information, data and results of the life cycle assessment.

Table 1. General information of EPD

Environmental Product Declaration

EM24DINAV53XE1X

Foreword

This document represents the EPD study conducted for the **EM24DINAV53XE1X** device manufactured by Carlo Gavazzi Controls S.p.A., in accordance with the EPDIItaly Program and its Regulations, developed in accordance with ISO 14025 and aimed at providing a tool for the development, verification and publication of Environmental Product Declarations.

The study was carried out in accordance with PCR EPDIItaly011 (*PCR for electronic and electrical products and systems – Meters*), which identifies and documents the objective and scope of LCA-based information for the product category, the rules for producing additional environmental information, the life cycle stages to be included, the parameters to be addressed, and the manner in which the parameters are to be collected and communicated in a report.

Producer information and environmental policy

Carlo Gavazzi Controls SpA develops, manufactures and markets monitoring relays, timers, energy management systems, fieldbus systems, providing solutions for the industrial, residential and commercial automation markets, in the field of low voltage installations.

The products are marketed in Europe, North America and Asia-Pacific through a network of 22 own sales companies and about 60 independent national distributors. Carlo Gavazzi Controls has a production plant in Belluno (via Safforze 8, 32100 – Belluno).

The company already holds the following certifications, issued by accredited bodies:

- ISO9001 (since 1997)
- ISO14001 (since 2009)

Carlo Gavazzi Controls is committed to continuously reducing the environmental impact of its products throughout their life cycle, through the implementation of an environmentally conscious design process based on the principles of the EN 62430 standard and an ISO14001 certified environmental management system. The declared environmental claims have been assessed with a qualitative approach on the environmentally conscious design process.

Environmental Product Declaration

EM24DINAV53XE1X

Product Information

The product under analysis is device **EM24DINAV53XE1X**, belonging to the METERS family, nominal consumption 2.9 W (0.0029 kW), weight 308.3 g (0.3083 kg) including packaging and manual.

The adopted functional unit was defined, based on the reference PCR, as **a device, characterized by its own operating power at 0.0029 kW for a life time (RSL - Reference Service Life") of 20 years, including its packaging, and operating throughout its useful life.**

These are electrical energy measurement devices, performance class 1, indirect measurement, and comply with the following international regulations: Electromagnetic Compatibility Directive, RoHS Directive.

Product assembly and testing are carried out at the Carlo Gavazzi Controls production site.

Regarding the use phase, the product does not require periodic maintenance, is considered to be active throughout its estimated useful life of **20 years**, with a nominal consumption of 2.9 W at a voltage of 120-277 V ac L-N, 50/60Hz.

The finished device is then sent to the various Gavazzi distribution centers or, in some cases, directly to a specific customer.

Product family	Meters	
Product identification number	EM24DINAV53XE1X	
Technical Data	Power: 2.9 W (0.0029 kW) Frequency: 50/60Hz Weight: 0.25563 kg (packaging excluded) Service Life Time (RLS): 20 years Current Intensity: In = 5 A, I _{max} = 10A	
Packaging	Weight: 0.05267 kg (52.67 g) Material: Paper and Cardboard

➡ Materials and constituents of the product

The declaration of materials is made in accordance with EN IEC 62474.

The products comply with substance restrictions in the EU RoHS directive (2011/65/EU).

Any recycled material content in the device is unknown.

Below is the total mass of the product (including packaging) and the weight percentages of each individual raw material to the total product.

Total mass of the device	0.3083 kg (including packaging)

Information related to the study

System boundaries	The boundaries of the study system are “ cradle-to-grave ”.
Geographical validity	Global
Reference year data	2023
Reference tool	This EPD was generated using the results automatically generated by the Excel tool “LCA tool_dati 2023_GAV – rev4” of 15/11/2024

Table 4. Information related to the study

The assessment of all potential environmental impacts above is based on the entire life cycle of the product under analysis: production, distribution, installation, use and end of life.

The elements and processes considered for the assessment of impacts related to each phase are described below:

Production	<ul style="list-style-type: none"> • Product and packaging raw materials (primary and secondary), auxiliary materials and related transportation • production and processing processes (involving energy and water consumption, air emissions, waste generated by production) • The energy sources behind the electricity grid used in manufacturing is the italian residual mix 0,649 kg CO2 eq./kWh (Ecoinvent 3.10) 																					
Distribution	<ul style="list-style-type: none"> • transportation from the Gavazzi plant to the latest distribution logistics platforms <table border="1" style="width: 100%; text-align: center;"> <thead> <tr style="background-color: #FFD700;"> <th colspan="3">FINISHED PRODUCT DISTRIBUTION (CoD)</th> </tr> <tr style="background-color: #FFF2CC;"> <th>Distribution center finished product</th> <th>% distributed to the CoD</th> <th>Further distribution at the continental level?</th> </tr> </thead> <tbody> <tr> <td>CGC-CdD Italy</td> <td>97.81%</td> <td>Sì</td> </tr> <tr> <td>CGC-CdD Spain</td> <td>0.00%</td> <td>Sì</td> </tr> <tr> <td>CGC-CdD USA</td> <td>2.08%</td> <td>Sì</td> </tr> <tr> <td>CGC-CdD Canada</td> <td>0.00%</td> <td>Sì</td> </tr> <tr> <td>CGC-CdD Singapore</td> <td>0.10%</td> <td>Sì</td> </tr> </tbody> </table> <ul style="list-style-type: none"> • transportation from Gavazzi's CdD to the specific customer (Company Name, Country) 	FINISHED PRODUCT DISTRIBUTION (CoD)			Distribution center finished product	% distributed to the CoD	Further distribution at the continental level? Table 5. Processes considered at various stages of the study

The LCA study was carried out according to ISO 14040/14044 standards, following the guidelines of IS EN 50693:2019.

The software used for impact assessment is SimaPro 9.6.0.1; Ecoinvent 3.10 database.

The methods used to calculate impacts refer to the CML baseline and IPCC method for the climate change impact category.

Site-specific data were used for all of the following processes:

- production and transportation of device raw materials, auxiliary materials and packaging materials;
- manufacturing processes, plant energy consumption, air emissions and waste;
- weight, power of the device;
- transportation to the distribution center (last logistics platform).

Generic data were used for:

- recycling, energy recovery and disposal rates for primary and secondary packaging materials and WEEE (global data).

Default scenarios described in PCR 007 and PCR 011 were used for:

- transportation to the point of sale: intercontinental and local transportation scenario;
- Lifetime (RLS) of the device: 20 years.

Environmental Product Declaration

EM24DINAV53XE1X

The potential environmental impacts assessed through an LCA of the **EM24DINAV53XE1X** device are given in Table 6 below.

Impacts were calculated using SimaPro Developer 9.6.0.1 software and the Ecoinvent 3.10 database.
